University in society.

Development and integration at EU's borderlines by dialog and knowledge exchange.

The joint roundtables aim at 'outsourcing' the main results of the project to the stakeholders who are not necessarily involved in the academic field: policy-makers, civil society activists, professionals and develop a favourable context for a tripartite debate university-policymakers-society on specific issues in EU Eastern borderlines to find jointly best practices and solutions.

The meetings will address specific topics on ENP and CBC as resulted from research and exchange knowledge within the network. To stimulate the interest of the target groups in playing an active role in the debate, we will initiate an awareness campaign including documents which will synthetize the key result of the research.
